Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

Devon requests a 30 day extension to the Sundry Notice that was approved on October 25th (see attached). The Ashton spudder rig drilled surface hole and run surface casing on November 11-13, 2010. It then moved off location on November 13, 2010. Due to delays in the rig schedule, Patterson 41 has not been able to move onto the Mark Twain 5 Fed Com 2H yet. We anticipate Patterson 41 to be available within 30 days.

Extension granted for 15 days.

Patterson 41 to be drilling by end of day 01/24/11.

14. I hereby certify that the foregoing is true and correct.

Devon Energy Production Company L. P. respectfully requests to set the surface casing using an Ashton Oilfield Services rig. The rig plat is attached. This rig will be used only to set the surface casing and will leave the location once the surface casing has been run and cemented. Another rig will drill the remainder of the wellbore. The reasons for using the smaller rig to set surface are: rig availability and economics.

The BLM will be contacted 24 hours prior to commencing drilling operations. The surface casing will be run and cemented back to surface as per the approved APD. The well will be secured with a flanged wellhead that will have a flanged cap secured on top of the wellhead. Another rig will be on location to drill the remainder of the wellbore within 60 days after the Ashton rig has left the location.

Contact BLM prior to all rig moves
