NATURE OF RELEASE

Type of Release: Produced Water	Volume of Release 40 bbls	Volume Recovered 40 bbls
Source of Release Produced water line at heater treater	Date and Hour of Occurrence 08/31/2010	Date and Hour of Discovery 08/31/2010 12:30 P.M.
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Mike Bratcher - OCD	
By Whom? Josh Russo	Date and Hour 09/01/10 8:44 P.M.	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

N/A

Describe Cause of Problem and Remedial Action Taken.*

The produced water line at the heater treater separated. The PVC at the heater treater was replaced with steel line.

Describe Area Affected and Cleanup Action Taken.* Initially, 40 bbls of produced water were released and remained with the tank berm. All free standing fluids were recovered. Tetra Tech sampled the site and excavated and removed approximately 40 cubic yards of chloride impacted soils from the site on November 16, 2010. The soils were transported offsite for disposal at CRI in Carlsbad, NM.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
