NATURE OF RELEASE

Type of Release Hydrocarbon & Produced water.	Volume of Release 5 bbls Hydrocarbon & 18 bbls Produced water.	Volume Recovered 4 bbls Hydrocarbon 15 bbls Produced Water.
Source of Release. Flowline.	Date and Hour of Occurrence 1/18/2009 6:00am	Date and Hour of Discovery same
Was Immediate Notice Given? Yes No X Not Required	If YES, To Whom?	
By Whom?	Date and Hour	
Was a Watercourse Reached? <input type="checkbox"/> Yes X No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

Scale plugged the 2" polyline causing the line to rupture. The release occurred on location 10' north of the pumping unit. A section of the poly was removed from service the line was repaired and then placed back into service.

Describe Area Affected and Cleanup Action Taken.

The impacted area was located on location due north of the wellhead. The soil in the area is loamy soil over laying Caliches. The weather at the time of the release was dry and clear. The impacted area was measured to be 25'x15'. The visibly impacted soil was excavated and then hauled to an NMOCD approved Solid waste disposal facility. Soil samples will be taken for analytical from the excavated area. The soil samples will be submitted to a second party Lab. The TPH will be analyzed using EPA method 8015M; B-TEX will be analyzed using EPA method 8021B. When analytical results report the TPH and B-TEX to be under the RRAL for the site, the excavation will be concluded and the excavated area back filled back to grade using clean soil. A final C-141 form will then be submitted to the NMOCD requesting closure for the release that occurred on 1/18/2009.

Site ranking Depth to ground water - >100', Wellhead protection area - > 1000', Distance to surface water body - > 1000' site ranking score - 0

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
