NMPM

(Meridian)

Undesignated

(Field)

Chaves

(County or Subdivision)

New Mexico

(State or Territory)

The elevation of the derrick floor above sea level is 3712 ft. OL

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Did not encounter artesian water zone and therefore, 7" casing was not run as originally proposed. 5-1/2" casing will be run to total depth and cemented with 300 sacks and circulated to surface.

The above has been approved by Mr. James Wright
State Engineer's Office.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
