The elevation of the derrick floor above sea level is 3517 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

- 1. Filled hole with mud.
- 2. Put 8 sacks of cament in the bottom of the hole.
- Put cement plug from 60¹ below the surfact to the surface (17 sacks).
- 4. Restored location and erected a permanent marker.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
