(Meridian)

Wildcat
(Field)Chaves
(County or Subdivision)New Mexico
(State or Territory)

The elevation of the derrick floor above sea level is 3594 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

A 4-3/8" hole was drilled to a total depth of 575'. No appreciable water was found in the section to total depth. A 10 sack cement plug was set at the interval 330' to 430', thus isolating any shallow water zones above the Queen formation at 368'. 5 sacks of cement were placed at the surface with a regulation 4" pipe marker set in the cement.

Inspected by Knut
5-13-58

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
