The elevation of the derrick floor above sea level is \_\_\_\_\_ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Propose to drill with Rotary to test Devonian expected at approximately 6500 feet. Will set approx. 100 feet of 1363/8 size surface casing & circulate to surface. If commercial production is encountered, will set 461/2 size oil casing string.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
