Mr. George Hatch
Oil Conservation Commission
P. O. Box 2088
Santa Fe, New Mexico

Dear George:

Here is the plugging program for the H. E. Barnes wells
as per your request.

#1 - SW NE 32-7S-26E TD1167 PB1151
Spot a 15 sack plug @ TD 1151
" " 15 " " @ 400
" " 5 " " @ surface with marker

Intervals between plugs to be filled with mud.

#2 - SE NE 32-7S-26E

The only forms received on this well is the Notice of
Intention to Drill. However, according to the Scout Report,
he drilled it to a TD of 101' and cemented 8 5/8" @101 w/50
sacks cement. If this report is correct, they could fill it
with mud and set a 5 sack plug at the surface with the marker.

Very truly yours,

OIL CONSERVATION COMMISSION

W. A. Gressett
Supervisor, District No. II
