DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

We propose to drill to a depth of approximately 375' using 4 3/4" bit, coring the Upper Queen Sand expected at a depth of 350'. If oil pay is encountered in the Upper Queen Sand, the hole will be reamed to 6 1/2" and 4 1/2" OD casing will be cemented with 25 sacks near the top of the Queen formation for completion attempt. *Cement will be circulated to surface.*

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
