Federal Chaves
Well No. **3-14** is located **1650** ft. from **S** line and **330** ft. from **E** line of sec. **14**
NE/4SE/4 Section 14 **138** **37E** **N.M.P.M.**
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Wildcat **Chaves** **New Mexico**
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging, cementing points, and all other important proposed work)

I plan to drill a 1,000' Queen sand test, using rotary tools all the way.

7" surface pipe to be cemented at approximately 100' with 25 sacks.

We plan to core the Queen sand. If we find production a 4 1/2" oil string will be cemented through the pay with 100 sacks.

All casing will be run and cemented, using methods approved by the U. S. Geological Survey.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
