Detailed account of work done, nature and quantity of materials used, and results obtained.

Placed a one hundred and fifty foot plug of 25 sacks of regular neat cement from TD of 1326 back to 1176' by pumping cement down drill stem and then displacing drill stem bore with mud. Packed drill pipe out to a depth of 400' and there placed a 90 foot plug from 400' to 310' by the same method. Then pulled drill pipe up to 60' depth and cemented to surface using approximately 16 sacks of cement. Total cement used was 50 sacks and the interval in the well bore between the cement plugs is full of heavy drilling mud. There is no casing left in the well. The pits have been filled and the location leveled and cleaned of junk.
