1. The purpose of this study is to determine the effect of the use of the word "and" on the comprehension of a sentence. The study was conducted with 100 subjects, 50 males and 50 females, aged 18 to 25 years. The subjects were divided into two groups of 50 each. The first group was given a sentence with the word "and" and the second group was given a sentence without the word "and". The results of the study showed that the subjects in the first group had a higher comprehension score than the subjects in the second group. This suggests that the use of the word "and" improves the comprehension of a sentence.
