Coyote **neen** **Chaves** **New Mexico**
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is **3698** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Original plans called for a total depth of approximately 850'.
Request permission to deepen to a depth of approximately 1750'
to test the **San Andres** Formation.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
