FULL DETAILS OF PROPOSED PLAN OF WORK
(FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS)

Plans are to run 250 to 300' of 8 5/8" surface casing, whatever amount is needed, and mud the pipe in instead of cementing at this time, providing we are able to get a proper shut off of any water by using mud. After we get to total depth and there is enough of a show to warrant running an oil string and fracturing, then we will come back up the hole and set a bridge and properly cement the surface casing prior to any testing.
