Detailed account of work done, nature and quantity of materials used and results obtained.

On Wednesday night November 7, this well was drilled down with an under-runner to 511' and 2" of 10" L.D. lapweld used casing with shoe was run. This 10" had been run to 458' and mudded but did not get a water shut off due to additional water sands. It was not found necessary to run this casing as it was re-run to TD of 511' & 2". It was set in an asphaltite break and a good shut off of water was acquired. Drilling at 889' as of 10:00 A.M. November 10. No water in hole.
