17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

We propose to test the existing perforations (1578-88', 1596-1614', 1658-62', 1688-96', 1720-34', 1750-58', 1774-76' & 1784-92').

If commercial production is not indicated, we plan to plug and abandon the well by setting a CIBP @ 1550' & cementing with 35 sx cement & perforate casing annulus between the 4½ & 7" @ 245' and attempt to bring cement to surface. If circulation can not be established, we will set a 100' plug @ 195 - 295' & 50' surface plug.

18. I hereby certify that the foregoing is true and correct
