RE: Multi Point Back Pressure Test  
for Gas Wells  
O'Brien "XX"  
#1-A-13-8-29  
Undesignated Atoka Morrow

Dear Mr. Clements:

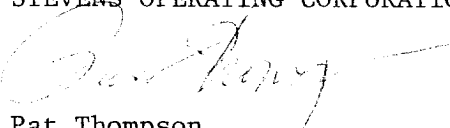

We are in receipt of your second notice dated November 8, 1983, due November 15, 1983 for Multi Point Back Pressure Test on the above referenced well. Please be advised that we do not have sufficient pressure or flow capacity to run a Four Point Test.

We are pumping water out of the tubing and commingling the gas from the casing side. Casing pressure is 35# and bottom hole pressure is 2778#. We are pumping on an average of 45 - 55 barrels of water per day and pumping from 8,242 feet. Because of the way the well is set up, we previously ran a gas/oil ration test and the results were submitted to your office.

If you should have any further questions or if we can be of assistance to you in this matter, please do not hesitate to contact me.

Very truly yours,

STEVENS OPERATING CORPORATION
