MEMORANDUM

TO: MIKE WILLIAMS  
FROM: LARRY VAN RYAN   
SUBJECT: NORTH KING CAMP-DEVONIAN FIELD

After visiting with you the other day, I went back and reviewed Order R-9035. The order gives the Stevens' Deemar Federal an allowable of 49 BOPD and the Santa Fe Exploration Holmstrom No. 1 an allowable of 125 BOPD. The total allowable for the pool is 235 BOPD including 61 BOPD for the undrilled NE/4 of Section 9.

I don't know if this makes any great difference in the Oil Proration Schedule but it may affect the statistical report as it is showing the Deemar as overproduced as the allowable is calculated on 34 BOPD.

I'm not sure how to go about changing either of these reports or if they need to be changed. Just passing this along for your information.
