Re: #11 State E-92
SW NE 26-10-26

Gentlemen:

In reference to your letter of July 7, 1967 Well E-92 No. 11 is in a temporary abandoned condition at this time. The previous operator of this well drilled it and set pipe but never produced it because of sand difficulties. Since taking over we have cleaned the well out and logged it but were not able to produce any fluid from it. We are therefore continuing to carry it in a temporary abandoned status. Depending upon the success of our water flood we may request that this well be converted to injection. If you require further information concerning this well we will be happy to supply it.

Very truly yours,

Frank Darden
