March 25, 1963

Well No. Crandell 1-26-P is located 330 ft. from IN line and 330 ft. from E line of sec. 26
26 6 South 26 East 100M
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Wildcat Chaves New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3840 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is proposed to plug and abandon the above well by placing a 100' cement plug over the porosity section of the San Andres formation from 1485 to 1385, a 50' plug across the shoe of the surface casing from 175' to 125' and a five sack plug in the top of the surface casing with the appropriate dry hole marker installed.

Verbal approval for the above procedure was obtained March 23, 1963.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
