Chaves County, NM

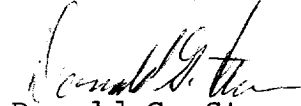

Dear Mr. Gressett:

Enclosed are form C-103's covering the workover of the above captioned well which was the subject of your letter of September 23, 1976. This form should have been forwarded your office some two months ago.

Form C-104 was re-sent your office in accordance with a computer printout request dated September 10, 1976, which stated that the transporter was Permian, not Mobil. The form was filed to properly designate Mobil.

The gas transporter is Stevens Oil Company, but this well has not yet been hooked up since the gas volume is TSTM and is uneconomic. If a proposed gas price increase is forthcoming then such hookup will be economic and will be accomplished.

Yours very truly,

Donald G. Stevens
