Well No. **1** is located **2310** ft. from **N** line and **330** ft. from **W** line of sec. **20**

SW 1/4 **20** **6-S** **26-E** (Meridian)
(1/4 Sec. and Sec. No.) (Twp.) (Range)
Wilcox **Chaves** **New Mexico**
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is **3738** ft. **Gr.**

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

Primary objective **Slaughter** some **San Andres** formation at about **1025'**. Test was temporarily shut down at **407'**, **1964**, due to failure of contractor to carry out his contract obligations. Now **10 3/4"** surface pipe previously set & cemented at **344'**. Feb. 26, 1965, moved in rotary rig washed down and drilled hole to **372'**, encountered severe lost circulation trouble could not keep enough mud in hole to drill with. Finished moving off rotary rig March 5 to 9th, 1965. Harold Kersey Drilling Company of Artesia will begin moving in cable tools Apr. 8, 1965, to drill test to San Andres. Contract was let to Mr. Kersey on term pay basis to depth of approx **1025'**. Actual drilling operations to be started on about 9 or 10th. Actual drilling operations to start sooner if labor available before 9 of 10th of Apr. Will furnish daily drilling reports and any other information required.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
