DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We plan to drill with rotary tools a San Andres Test to approximately 1600 feet in depth. We will set 8-5/8", 24 # on top of the pay, expected around 1300' in depth, returning cement to surface. We will move off retary rig and move in cable tools to drill the pay. The 8-5/8" casing will be cemented and tested by approved methods.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced. Company F. T. BRAHANEY Address P. O. BOX 1695 MIDLAND, TEXAS Title perutor

INSTRUCTIONS FOR COMPLETION OF FORM C-128

- 1. Operator shall furnish and certify to the information called for in Section A.
- 2. Operator shall outline the dedicated acreage for both oil and gas wells on the plat in Section B.
- 3. A registered professional engineer or land surveyor registered in the State of New Mexico or approved by the Commission shall show on the plat the location of the well and certify this information in the space provided.
- 4. All distances shown on the plat must be from the outer boundaries of the Section.
- 5. If additional space is needed for listing owners and their respective interests as required in question 3 of Section A, please use space below.
