

UNITED STATES GOVERNMENT

Memorandum

SEP 28 1964

O. C. C.
ARTESIA, OFFICE

TO : M. L. Armstrong, Supervisor and Oil and Gas Inspector, N.M.O.C.C., Artesia, New Mexico

DATE: September 25, 1964

FROM : Billy J. Shoger, U.S.G.S., Roswell, New Mexico

SUBJECT: Sundry Notice

Returned herewith is a Sundry Notice for Charles A. Lee well No. 3 Dale Federal showing corrected footage. The well location discrepancy should have been noticed by me. Also, the Sand Jet perforated intervals were corrected by this office from information supplied by Mr. McFadden, superintendent for Dr. Dunn. It is my understanding that Mr. M. G. Peters is now in Atlantic City and that McFadden will handle Charles A. Lee's wells. If this is so, maybe we will be able to obtain current and accurate reports and not have to receive such notices as the attached corrected one.

BILLY J. SHOGER
Roswell District Engineer
