FORM C-103

1. Dated 4-17-2002 stated that the operator had installed surface equipment. If there was no production they would turn it into an injection well.
2. Dated 6-12-2002 stated that they would pull the well as soon as their rig was repaired.

Our last inspection was on 6-19-2002. At that time there was no activity and the well was not producing.
