Dear Mr. Gressett:

Re: Buffalo Valley Com. #1-G,
35-14S-27E, Buffalo Valley
Penn. Pool

As discussed with Mr. Stametz this week, the Southwest Production Corporation Buffalo Valley No. 1 is not capable of continuous flow and cannot be tested therefore with the normal multi-point back pressure test.

At the present time the well is producing on intermittent flow pending additional study. We request your permission to continue to produce this well without filing the standard test required by Rule 401.

Very truly yours,

SOUTHWEST PRODUCTION CORPORATION

C. R. Appledorn
