Gentlemen:

On January 25, 1972, an inspection was made of the site of the subject plugged and abandoned well. Said inspection revealed the following items which require correction before the plugging report may be approved.

1. Marker not complete. Needs unit letter or footage.
2. Location must clear of all junk, removed or buried.
3. Pits must be levelled and cellar filled. All deadmen must be cut and covered.
4. Need C-103 Subsequent Report of P&A, Form C-105 well record and a copy of the electric logs.

Please notify this office when the work has been done so that we may reinspect the location.
