Re: Multi Point Back Pressure Test
Due October 7, 1972
BLACKROCK OIL COMPANY
Bates McIntyre Federal No. 1
Chaves County, New Mexico
Haystack Cisco Gas Pool

Gentlemen:

It is requested that the above scheduled test be delayed until December 7, 1972, as this well encountered problems in connecting to the gas transmission line. It was necessary to install a considerable amount of transmission line and a compressor. The well has just recently started producing on a regular schedule, therefore, it is felt the 60 days after test would be more accurate if it was delayed.

Yours very truly,

BLACKROCK OIL COMPANY

O. Doyle Butler
