Re: L E Ranch 16 #2-B
Sec. 16-11S-28E
Chaves County, New Mexico

Gentlemen:

This well was spudded January 14, 1972 and is now several hundred feet deep. Saturday, April 15, 1972 they removed the first rig and replaced it with a larger rig.

I am amazed that no reports have been received by you.

Bruce Wilbanks was to file reports as I understood it. We expect to get the reports filed in accordance with your requirements.

I tried to call you today, April 19, at your office in Artesia but got no answer. We then tried to reach you at the Oil Conservation Commission in Hobbs and were informed you were there attending a commission meeting. We left word for you to report on the call.

We tried to contact Bruce Wilbanks in Midland, but he was not there. He was out in the field near Eunice, New Mexico and could not be reached by telephone. We left word at his office and home for him to report on our call.

We appreciate your consideration in bearing with us.

Respectfully,

Plains Radio Broadcasting Company
