17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

We propose to continue drilling to our original objective, the San Andres zone occurring in the L.E. Ranch 9-1 at 2,150 - 2,170', after testing and depleting the stray zone that occurred in this well from 1,850 to 1,856'. This zone produced only 160 barrels of oil before depleting. We ran and hung our 5 1/2" production casing in such a manner that we could pull it and deepen to our original objective. We plan to pull this casing, drill an 8" hole to approximately 2,200', run 5 1/2" casing at that point and cement same. Then complete in San Andres Formation.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
