17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

We have decided brine deliverability is not sufficient for conversion to a brine source well. Permission was given by USGS in Artesia, New Mexico, to plug well as follows: 100 sxs Class C cement on top of CIBP at 1250-890' and 10 sx plug at surface w/Dry hole marker. Heavy mud will be placed between each plug.
