Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

I propose to drill and test the Abo and intermediate formations set 900' of 10 3/4" surface casing and cement circulated to shut off gravel and caving. If needed (lost circulation), 5/8" intermediate casing will be run to 1550' with enough cement calculated to tie back to the surface casing. Temperature survey will be run to find the cement top. If commercial, production casing will be run and cemented with adequate cover, perforated and stimulate as needed for production.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
