

7. METHODS OF HANDLING WASTE DISPOSAL: cont.....

- H. All trash and debris will be buried or removed from the wellsite within 30 days after finishing drilling and/or completion operations.

8. ANCILLARY FACILITIES:

- A. None required.

9. WELLSITE LAYOUT:

- A. Exhibit "D" shows the relative location and dimensions of the well pad, reserve pits, and major rig components. The pad and pit area has been staked and flagged.
- B. Mat Size: 195' X 175'.
- C. Cut and Fill: The location is relatively flat and will not require and cutting and filling.
- D. The surface will be topped with compacted caliche and the reserve pit will be plastic lined.

10. PLANS FOR RESTORATION OF THE SURFACE:

- A. After completion of drilling and/or completion operations all equipment and other material not used for operations will be removed. Pits will be filled and the location cleaned of all trash and junk to leave the wellsite in an aesthetically pleasing a condition as possible.
- B. Any unguarded pits containing fluids will be fenced until filled.
- C. If the proposed well is non-productive, all rehabilitation and/or vegetation requirements of the Bureau of Land Management and the United States Geological Survey will be complied with and will be accomplished as expeditiously as possible. All pits will be filled and leveled within 90 days after abandonment.

11. OTHER INFORMATION:

- A. Topography: The land surface in the vicinity of the wellsite is flat with an elevation of 3720 feet. The surface slopes west at 10 feet in 2500 feet. Lloyd's Canyon is 300 to 400 feet north of the drillsite and drops off 20 to 30 feet.
- B. Soil: The topsoil at the wellsite is mostly an alkali clay with sand, and scattered caliche rock.
- C. Flora and Fauna: The vegetative cover consists of sparse miscellaneous grasses, including Threawn, Grama, Saltgrass along with mesquite, yucca, cacti, and other miscellaneous desert flowers and weeds. Jackrabbits, cottontails and quail were observed, and it is likely that other typical semi-arid desert wildlife inhabit the area, which is used for cattle grazing.
- D. Ponds and Streams: There are no streams (flowing) or natural or manmade ponds in the area.
