Re: Application for Surface Commingling
NM Fed Com #13

Dear Mr. Coats,

Summit Resources received the attached violation #43 IPR 2162.7-
on the subject well. This property was purchased in an
auction 12/1/93 and has been commingled with two other wells also
purchased in the auction. Summit Resources was not aware that
this was in violation of any BLM regulations.

Below are the three wells that are commingled at the surface,
with sales into a common sales meter:

Case No.	Well	TA #	Legal Location
NM-22846	NM Fed Com #1	RNM 136	660 FSL 660 FWL, Sec 5, T39, R25E
NM-22846	2 Federal #1	NA	660 FSL 1960 FSL, Sec 6, T39, R25E
State lease	McElvain St Com #1	SCR 289	990 FSL 990 FSL, Sec 6, T39, R25E

Cell are also wells
Each well has an individual check meter on it's location prior to
commingling into a gathering system and ultimately to the sales
meter located on the location of the McElvain St Com #1 well.
The Transwestern Pipeline Company meter station #18950 is located
180' north of the McElvain well. Once the sales volume has been
obtained from the common point meter, individual well sales
volumes are allocated back to the three wells based on their
integrations.

It is requested that the BLM approve the surface commingling of
the above mentioned wells to the common point sales meter. If
you require any additional information, please give me a call at
405/341-7481.
