17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, including estimated date of starting any proposed work. If well is directionally drilled, give wellbore locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

It is proposed that the approved casing program be revised to provide for setting of about 1143' of 8 5/8", 24#, J-55 casing, rather than 300' as was proposed in the application to drill. Cement will be circulated to the surface. The 4 1/2" casing will remain as proposed.

This change is proposed to protect possible porosity zones in the San Andres formation.

Dirt work is presently being conducted in preparation for drilling of this location.

Subsurface Safety Valve: Manu. and Type _____ Set @ _____ Ft.
