

all equipment and other material not needed for operations will be removed. Pits will be filled and the location cleaned of all trash and junk to leave the wellsite in as aesthetically pleasing condition as possible.

- B. Any unguarded pits containing fluids will be fenced until they are filled.
- C. After abandonment, all equipment, trash and junk will be removed and the location cleaned. Any special rehabilitation and/or revegetation requirements of the surface management agency will be complied with and accomplished as expeditiously as possible.

11. OTHER INFORMATION:

- A. Topography: The terrain of the drillsite area is nearly level. Regional slope is to the west toward the Pecos River.
- B. Soil: Top soil is sand.
- C. Flora & Fauna: The vicinity surrounding the drillsite is semi-arid desert rangeland. Vegetative cover is very sparse. Flora consists primarily of broomweed and range grasses interspersed with mesquite, yucca and other desert plants. The only wildlife observed were lizards and rabbits; however, fauna for this type of habitat also includes snakes, rodents, skunks, coyotes, dove, quail and other small birds.
- D. Ponds & Streams: None. Pecos River is .98 mile to the west.
- E. Residence & Other Structures: Nearest occupied dwelling is 1.9 miles to the north. Nearest water well is 1.9 miles to the north.
- F. Archaeological, Historical & Other Cultural Sites: An archaeological reconnaissance of the well pad and new road area was made by New Mexico Archaeology Services (NMAS) and no significant artifacts were observed.
- G. Land Use: Grazing and occasional hunting.
