Re: Marbob Energy; Shut In Wells Twin Lakes San Andres Pool

Dear Johnny;

In our search for shut in and non producing wells, it is noticed that the following list of wells are shown on your C-115s as producing but no volumes are reported. If these wells are infact not producing please send me by Febuary 2, 1998 a plan and time frame to bring these wells into compliance with rule 201.

Wells # 10,12,24,44,51,53,72,82,96,101,102,106,108,110,112, 115,117,120 and 121.

Also TLSAU # 8 & # 114 were temperarilly abandoned and mechanical integrity test were run. The five years on these test expired June of 1996. Well # 64 is shown as shut in but we have no record of an MIT being run.

Yours truly,

Tim Gum
