13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

- It is necessary to commingle production from Bravo Federal #5 in SE/4 of NW/4 of Section 30, T6S-R25E with Bravo Federal #4 in SE/4 of SE/4 Section 30, T6S-R25E because purchaser would not lay a pipeline to Bravo Federal #5. Pipeline laid by operator.
- Western Reserves Oil Co. has a meter at Bravo Federal #5 and gas produced at this well is metered before it leaves location then commingled with Bravo Federal #4.
- Metered production from Bravo Federal #5 is subtracted from total production of both wells. Thus the difference is what #4 produced
- Sales point is located in the SE/4 of SE/4 of Section 30, T6S-R25E.

14. I hereby certify that the foregoing is true and correct.
