Pecos Slope Abo

Gentlemen:

In the near future Transwestern Pipeline Company, which purchases gas on the above captioned wells, is going to be shutting down their compressor in this area for several days. Pedco would like to wait until this down period occurs before we do the Multi Point Back Pressure Test for these wells. This test will be performed and the results will be immediately forwarded to the NMOCC when Transwestern shuts in the compressor for these wells.

Your cooperation in this matter will be greatly appreciated.

Yours very truly,

PETROLEUM DEVELOPMENT CORPORATION

Jim C. Johnson
