Attention: N. G. P. A. Well Classification Section

Gentlemen:

McClellan Oil Corporation, (McClellan) encloses herewith two (2) copies of an Application for well classification determination under the rules and regulations of the Natural Gas Policy Act of 1978 for a dual well classification, i.e., Section 102, New Onshore Reservoir and Section 107(c)(5) Tight Formation Gas, together with three (3) additional copies of FERC 121 covering both NGPA categories as noted above for the referenced well.

We shall appreciate you stamping the enclosed copy of this letter with the date of filing and return same to us in the enclosed stamped envelope.

For your information, the first well drilled in this reservoir was the the McClellan "PJ" Federal No. 1 Well. Our Application for a NGPA Section 102, New Onshore Reservoir was filed with the U.S.G.S. on the date of September 17, 1980, Docket No.: NM-1293-80, FERC Control No.: 8118342 as per the attached records from the U. S. G. S. and page 17127 from the Federal Register dated March 17, 1981.

All required data and forms are included with this Application, however, should you require additional information or data, please advise.

Sincerely yours,

*Mark McClellan*  
Mark McClellan
