17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*							

This is being submitted to confirm a telephone conversation on July 16, 1990 between Pete Chester (BLM) and Chuck Williams (BHP). Pete Chester gave verbal approval to conduct a 2 point test on the subject well as described below.

Allow well to vent to the atmosphere until stabilized at 400 psi and then flow for a maximum of 4 days, then allow to stabilize at 200 psi and then flow for a maximum of 4 days. Total amount of gas that will be vented is estimated to be 3000 MCF.

Information from the test will allow BHP to design a compression system for the well to maximize production.
