17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Pursuant to Onshore Order No. 2 (IV) Variances From Minimum Standard, operator requests approval of variances for pressure testing the following:

1. Ram-Type Preventors and Associated Equipment (III) (A) (2) (i) (ii).
2. Casing Strings Below the Conductor (III) (B) (1) (h).

Operator requests that the testing pressures be limited to a maximum of 1000 psi due to the following:

1. Maximum shut-in bottom hole pressure is less than 1100 psi.
2. Most rig pumps used in this area cannot safely test above 1000 psi.
3. Pressure testing above 1000 psi would require using an independent service company, resulting in a greater expense as well as taking more time in drilling this well.

18. I hereby certify that the foregoing is true and correct.
