Mr. Mike Williams  
NMOCD  
P. O. Drawer DD  
Artesia, NM 88210

Dear Mr. Williams:

Enclosed please find a Sundry Notice covering the Mabel #4. We send this report in now because of the lapse of time since casing was run on this well. However, completion has not been finished, because of communication between the perforated zone and a water-bearing zone. We intend to attempt another completion by additional squeezing and reperforating with a sand jet.

We also enclose a copy of a Compensated Neutron Log and a Dual Induction Log.

Yours truly

Harvey E. Yates, Jr.  
President
