PROPOSED CASING AND CEMENT PROGRAM

SIZE OF HOLE	SIZE OF CASING	WEIGHT PER FOOT	SETTING DEPTH	SACKS OF CEMENT	EST. TOP
12"	8 5/8"	24#	400'	200	surface
8"	4 1/2"	9.5#	2250	125	1500'

We propose to drill a 12" hole to 400' and run 8 5/8" casing with two centralizers, insert float and texas pattern shoe. 8 5/8" casing will be cemented with enough cement to circulate to surface. W.O.C. 18 hours and pressure casing to 500 psi. We then plan to drill an 8" hole to TD (2250). After drilling to TD we will make bailer tests and run logs. If the hole is dry we will plug and abandon it following NMOC rules and regulations. If the hole is completed we will run 4 1/2" casing to TD and cement with enough cement to cover the top of the pay with at least 500' of cement.
