17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Yates Petroleum Corporation is requesting a variance be granted in requiring the BOPE and casing to be tested to 1500 psi to testing the casing to 1000 psi. The rig pump will be used to do the testing.

Yates requests this due to several reasons:

- 1) Maximum shut-in bottom hole pressure in the Abo field is between 800 psi and 1050 psi. Pressure at the surface would be less than this.
- 2) The Abo formation is such that it has to be treated before it will flow.
- 3) Rig pumps used in this area cannot safely test above 1000 psi. In order to test to higher pressures, an independent service company would have to be hired. This would result in greater expense in drilling the well.
