13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

We are requesting a variance from Onshore #2 III-A-2ii. The blowout preventer that we propose to use is equipment commonly used with the smaller rigs which will be used to drill the proposed well. This BOP is sufficient to control the pressures encountered in the ABO formation. The Abo formation is an extremely tight formation which has limited formation pressures until frac.
