Re:
Whitney #4
Unit P, sec 34, T.10S, R.27E
Chaves Co., NM
Necessity of plugging notice

Dear Mr. Gum

The Whitney #4 was permitted under a bond owned by Yates Energy. The well was spudded using a cable tool rig. During operations the engine broke down and the hole never penetrated more than 10 feet. Due to continued mechanical problems the whole was abandoned. It is our understanding that the driller filled in the 10 foot hole and cleaned the site. Consequently we are not sure if the State requires a plugging notice.

Sincerely,

Douglas L. Waters
Senior Geologist

* Mr. Douglas L. Waters,

Yes A subsequent C-103 is
required on plugging actions
taken on the Whitney #4.
Please send this C-103 as soon
as possible.

Mike Stubblefield Field Rep II
