

9. WELL SITE LAYOUT:

- A. Exhibit "C" indicates the relation location and dimensions of the well pad, mud pits, reserve pit and major rig equipment.
- B. The location slopes very slightly to the east.
- C. The reserve pit will be lined with plastic to prevent loss of water. The pit will be fenced in a manner adequate to protect livestock and larger game animals.

10. PLANS FOR RESTORATION OF THE SURFACE:

- A. After completion of drilling and/or completion operations, all equipment and other material not needed for operations will be removed. Pits will be filled and the location cleaned of all trash and junk to leave the well site in an aesthetically pleasing condition as possible.
- B. Any unguarded pits containing fluids will be fenced until they are filled.
- C. If the well is non-productive or abandoned, the disturbed area will be rehabilitated using the preserved soil mentioned in 2. I. and 4. C.

11. OTHER INFORMATION:

- A. Topography: The topography is a gradual slope to the East in the vicinity of the access road and East in the vicinity of the drill pad. Regional slope is East toward the Pecos River, which is approximately 1 1/2 miles from the location.
- B. Soil: Sandy loam with limestone outcropping.
- C. Flora and Fauna: The flora consists of typical desert vegetation, such as yucca, cactus and various grasses. Fauna consists of desert wildlife such as coyotes, rodents, snakes, deer and antelope.
- D. Ponds or Streams: The Pecos River is approximately 1 1/2 miles East of the proposed location.
- E. Residences and other Structures: There is no significant residence or structures within 1 mile of the location.
