- Mewbourne Oil Company hereby requests off lease gas measurement as the pipeline requires the meter to be set at the delivery point. This point is in the SW/4 of the NE/4 of Sec. 33-T5S-R25E on Yates Petroleum Jamie #1. See attached maps. A 2" steel flowline will be laid along the road, and an individual meter will be set on the above mentioned well. Only gas from the Pecos Slope "34" Comm. #1 will flow through the meter and there will be no off lease commingling or storage facility.
- Maps are attached.
- Diagrams attached.
- The Pecos Slope "34" Comm. #1 makes approximately 250 MCF/D of .7 gravity gas with 1/2 BWPD.
- The gas from the Pecos Slope "34" Comm. #1 will be measured at the delivery point on the Jamie #1. This is the only gas being sold through the meter. No beneficial gas use will be required.
- No Federal royalties will be lost as the measurement will occur on one well only through the measurement station.
- No economic justification is necessary.
