12 1/2"	8-5/8"	24	420	sufficient to	circulate
7-7/8"	4 1/2"	10.50	2200	200	

Part ID-1  
2-24-95  
New San. & API

Describe the proposed program. If this application is to DEEPEN or PLUG BACK give the data on the present productive zone and proposed new productive zone. Describe the blowout prevention program, if any. Use additional sheets if necessary.

We propose to drill San Andres well with rotary rig and run casing with rig. Rotating head with BOP if necessary to prevent blow-out. Low bottom hole pressures are anticipated due to the previous history & number of wells that have been drilled in the field.

I hereby certify that the information given above is true and complete to the best of my knowledge and belief.
